**Project Summary**

Project Summary
This restoration project is located on Crow and West Fork Pine Creeks in the Joseph Creek headwaters. For Crow Creek, components include removing 5,702 feet of old fencing; constructing 8,712 feet of 4-strand fencing; 2 livestock crossings and 5 escape gates. An off-site solar watering system will also be constructed. On Pine Creek, 4,594 feet of old fencing will be removed; constructing 2,798 feet of 8-foot elk exclusion fence; 6,632 feet of 4-strand fence; seeding 1,560 feet of streambank and plant 3,200 live willow cuttings. OWEB funds are requested for the fence removal, fence construction and elk exclusion fence. Grande Ronde Model Watershed (GRMW) will fund fencing materials. ODFW and the landowner will fund the solar livestock watering system. OWEB funds are requested for contracted services (91%) and administration (9%).
